

# OPERABLE GLASSWALL PORTABLE ACCORDION

# PROJECT DESCRIPTION

# ACOUSTICAL GLASSWALLS

## Commonwealth Financial Network Boston, MA USA

Hufcor Acoustic Glasswall was the perfect choice for this corporate meeting room for the Commonwealth Financial Network offices in the Boston area. The acoustic glass walls provide opaque barriers between the main entrance corridor and two flexible meeting spaces that are separated by Hufcor Operable panels. The use of Benheim KNO-6 specialty glass panes allows natural light to enter the rooms, yet provides privacy for the meeting rooms. The retractable bottom seals increase acoustics and don't mar the wood floors during setup. The panels' powder coating finish matches the interior wallcoverings for a seamless appearance.

Hufcor Acoustic Glasswall is sound rated to 44 STC. For more information, call Hufcor at (800)542-2371 ext. 214, or visit [www.hufcorglasswall.com](http://www.hufcorglasswall.com) to find a distributor near you.
